

## **Addressing Misinformation and Rumors Concerning the DHS/P/WW/254/25 Tender and SPC Officials**

Klintas confirms participation in the DHS/P/WW/254/25 tender for Dinoprostone 3mg vaginal tablets issued by the State Pharmaceuticals Corporation (SPC). We provide clarity and address misinformation circulating about this tender.

Following our participation in the tender, we engaged in direct communication with SPC and have been fully apprised of the detailed steps undertaken, including the technical evaluation and the subsequent award decision. Based on our understanding, SPC followed its established tender procedures diligently and transparently throughout the process.

**Klintas firmly rejects rumors, particularly on social media, alleging improper actions regarding this tender. False information claims that the Managing Director, Mr. Mewan Sampath Subhasinghearachchi, offered this tender improperly. We understand Mr. Subhasinghearachchi was not a member of the committees involved in this tender decision and does not engage in such practices.**

**Furthermore, false social media posts, specifically on Facebook, claim that the Chairman, Dr. Manuj C. Weerasinghe, awarded this tender in violation of established process. We understand Dr. Weerasinghe also does not involve himself in such cases.**

**It appears some third parties are misusing our participation to harm the image and reputation of these officials.**

Klintas is not connected to these rumors or the dissemination of false information. We fully support SPC's processes and decisions, value our relationship, and remain committed to a strong partnership.

We understand SPC has initiated legal action against these false and defamatory claims. As a responsible partner, we fully support SPC's legal action to address this misinformation and protect the integrity of the tender process and the reputation of its officials.

We urge all parties to rely solely on official information from SPC regarding this tender process and to disregard any circulating rumors or misinformation.
